

# ACCREDITED APPRAISAL SERVICES

## Case Study

### THE CLIENT

The client is a global pharmaceutical conglomerate that is consistently ranked as one of the top three pharmaceutical companies in the world.

### CHALLENGE

The client had an assembly line in Trinidad and Tobago that they wanted to export to Venezuela. To complete the process, the company had to submit a certified appraisal of the equipment that was to be exported. They needed a certified appraiser to verify that the equipment was operational and to determine the fair market value of the equipment. The client had an incredibly tight timeline—they needed to have the assignment completed within two weeks.

### SOLUTION

Accredited appraisals conducted by EquipNet's team of certified appraisers.

### THE RESULT

As soon as EquipNet was presented with the assignment, we turned to our appraisal services. EquipNet's NEBBI-certified (National Equipment Business Builders Institute) Appraisers inspected the equipment, conducted the necessary research, and returned an appraisal report within seven days to present to the Venezuelan import authorities. The report was submitted on time and the equipment, valued at \$565,000, was successful redeployed to the company's Venezuelan facility.
